Columbia Parkway Lighting Project

WHAT/WHEN: Crews of the Delta Electric Company will begin work Thursday, **November 11, 2004** to replace the existing lighting poles and fixtures along the westbound side of Columbia Parkway from Bains Street to Kemper Lane. **The company should finish in 90 days.** The \$316,000 project will replace the existing light poles with a new “signature” light pole for the Parkway’s exclusive use. This fixture and pole has already been installed from the east end of the Columbia Viaduct to Bains Street. Crews will remove the existing wood poles and relocate all overhead wires to underground conduit. This project implements a portion of the 1996 Master Plan for Columbia Parkway Scenic and Historic Enhancements. The contractor will maintain two lanes of traffic within the project limits.

WHERE: **Columbia Parkway from Bains Street to Kemper Lane**

The Department of Transportation and Engineering oversees the rehabilitation and improvement of streets in the City of Cincinnati. The Department is also responsible for transportation planning, design, engineering services, structural and geotechnical services, right of way regulation and construction management. It is the clearinghouse for all City and regional transportation functions, and also serves as a liaison to the Southwest Ohio Regional Transit Authority. Visit us at www.cincinnati-oh.gov for additional information and construction activity.
